model reading or agent
code check: can reject a value
code decides
Router
reads the routing facts
quotation found in the file
workflow chosen by its condition
Claim reader
brief: request, parties, timeline
Process builder
adds needs, questions or steps: suggestions only
Reading 1
Reading 2
Reading 3
quotation found in the file
all readings agree
presumptions for unstated facts
otherwise the fact stays unresolved
true, false, open or not stated, with a quotation
admitted facts
below the line, no agent can record or change a deciding fact
Document finder
matches each need to a file
second judgment
same file, each item quoted
accepted documents
otherwise unusable: stays requested
Source checker
judges each item from its quotes
doubt about an agreed deciding fact is only a flag
Result checker
summary, reply draft, proposals
reads the evaluated checklist
evaluation with exact deferral
checklist: request · hold with a question · present
