Ventilation and heating log

With mould on an outer wall the landlord often blames the tenant's airing; a dated log shows how the flat was aired and heated.

Ventilation and heating log

next case: from Knowledge

"Ventilation log 14.10.–3.11.2026, bedroom: daily at 7.00 and 21.00, 10 minutes of full airing each time; room temperature 20–21 °C. Humidity readings are missing; a hygrometer has only just been ordered."
