

A document request depends on the active branch

Source rule: when condition *c* holds, establish fact *f*.

Case state		Process obligation		Branch-specific action
<i>c</i> is true	→	Establish <i>f</i>	→	Request missing evidence
<i>c</i> is false	→	Inactive	→	No request
<i>c</i> is unresolved	→	Not yet active	→	Clarify <i>c</i> first

For an active obligation: fact → evidence capability → document route

New evidence updates the case state; recompute the request.
